

Tableau helped Acumen in ensuring the management of their clients' assets in 3 countries with a 35-40% time and effort savings in terms of data mining and analysis.

CHALLENGE

Identifying global impact of COVID on airlines capacity and risk profile

Acumen wanted to analyze the impact of COVID 19 on the airlines' operations on a global scale and implement solutions to ensure that their clients' assets were protected. This massive data set needed to be analysed quickly and visualised well.

SOLUTION

Acumen Data Science team was able to gather important data points and then implement a dashboard to show the widespread impact. This allowed Acumen to analyse the airlines' operations and implement solutions to ensure that their clients assets were protected adequately.

- Consolidated 6 static reports into interactive visualizations
- Resulted in ensuring management of assets in 3 countries.
- Observed around 35-40% time and effort savings in terms of data mining and analyses
