

**MISY 4390**  
**Spring 2012**  
**Dr. Kakoli Bandyopadhyay**  
**Assignment 6**  
**Total Points: 20**  
**Due Date: March 6, 2012**

We will use the Tableau software to work on this assignment. Tableau is used to perform visual analysis for spreadsheet and databases. **We will connect to the spreadsheet sample: Superstore Sales.** The spreadsheet has the following fields:

Order ID	Order Date	Order Priority	Order Quantity	Sales	Discount	Ship Mode	Profit	Unit Price	Shipping Cost

## Things to do:

Using Tableau answer the following questions:

1. Which product category (furniture/office supplies/technology) yielded the **maximum sales** in which year (2009/2010/2011/2012)? (4 points)

**Hint:** drag and drop product 1 - category and order date from dimensions to columns and drag and drop sales from the fact table (measures) to rows. **Go to Label > Show Mark Labels.**

Product Category	Year	Sales

2. Which product - category yielded **maximum profit** in which year (4 points)?

Product Category	Year	Profit

3. Which product - category sold for the **maximum quantity** in which year? (6 points)

**Hint:** product - category and order date in columns and order quantity in rows. Click on “show me” icon and choose the stacked bar and click OK. Now find the maximum order quantity for each product category.

Product Category	Maximum Order Quantity	Year
Furniture		
Office Supplies		
Technology		

4. Which region made the maximum profit on which product category? (4 Points)

**Hint:** product category and region in columns and profit in rows. Find out the maximum profit for each region.

Region	Product Category	Profit
Central		
East		
South		
West		

5. Type product sub category had **maximum sales** in which year? (2 points)

**Hint:** product sub-category and order date in columns, and sales in rows. Use “show me” icon and choose aligned bar. Find out the product category which yields maximum sales and the year associated with it.

Product 2 – Sub Category	Sales	Year
